## “A Tradition Through Teamwork”

Bill Folsie  
HSE Director

Triton is proud to display our safety statistics from the last quarter. Our attitude towards safety is “*every way, every day*”. Triton’s HSE Director credits its success to a culture that has been built here from within. He claims when every employee from top to bottom is on the lookout for possible hazards, we can be perfect. IFO isn’t something Folsie hopes for, he expects it. “Triton’s process isn’t complicated”, says Folsie “Perhaps that’s why it works. Its easy to train personnel and there is less room for error.”

Triton aspires to be a trailblazer when it comes to its HSE program. Not only are we trying to keep our men and women safe, but we want to see the culture spread throughout the industry as a whole. If you would like a *lunch and learn* on any of our various safety topics please contact your Account Manager or [sales@tritondiving.net](mailto:sales@tritondiving.net) and we will come to you!
